

Confined Space Entry

This course is essential for any worker who is required to enter, supervise or authorize entry to confined spaces, and details all aspects outlined in the relevant Australian Standards, AS/NZS 2865:2009.

This course is aligned to the national standard for the Chemical, Hydrocarbon and Oil Refining Training Package (MSA07). MSAPMPER205C – Enter Confined Space, and also includes MSAPMPER200C – Work in Accordance with an Issued Permit (*prerequisite*).

Course Aims

- Raise participants awareness of the dangers of confined spaces
- Enable participants to work within systems that eliminate or reduce confined space risks
- Introduce participants to basic rescue procedures

At the completion of the training course participants will be armed with the skills, knowledge and confidence to work safely in a confined space. The course comprises an equal theoretical and practical component giving participants the opportunity to apply concepts in real situations.

Major Topic Areas

- Defining what a Confined Space is
- Design, Manufacture, Supply & Modifications
- Hazard Identification
- Risk Assessment
- Control Measures
- Safety of the Atmosphere
- Risk Control
- Education & Training
- Rescue & First Aid
- Record Keeping

Duration

The Confined Space Entry course is available in two formats:

- Qualification – 2 days (no prior training or qualifications)
- Refresher – 1 day (already completed a recognized qualification course)
